

Construction Notice

Issued on:
August 2026

Wilson Station Bus Underpass and Mezzanine Bridge Rehabilitation Overnight work on Allen Road to address electrical components

Timeline: Tuesday, August 25, 10:00 p.m. to Wednesday, August 26, 6:00 a.m. *

*Content / timeline is accurate at the time of this communication and is subject to changes due to weather and unforeseen circumstances.

Key Update

Overnight work will take place on Allen Road, resulting in northbound lane restrictions to address electrical components. A minimum of two lanes will remain open at all times.

Project Overview

Constructed in the mid-1960s (and last modified in 1976), the Wilson Station's mezzanine bridge and bus underpass, which are part of the Allen Road infrastructure, are deteriorating. TTC is undertaking a vital state-of-good-repair project to rehabilitate these two structures. Completing the work will ensure TTC maintains the long-term safety of the bridge and our transit operations and avoids significant long-term risks/costs from deferred maintenance.

Expected Impacts

- Lane reductions on Allen Road northbound
- Expect traffic delays in the construction area.
- Some noise, vibration, and dust are expected.
- No impact on TTC service due to this construction.

TTC service

Subway and bus service at Wilson Station will not be affected by this construction.
