

Underground Conduit Repair

Queens Quay and Bathurst Street/Eireann Quay Intersection

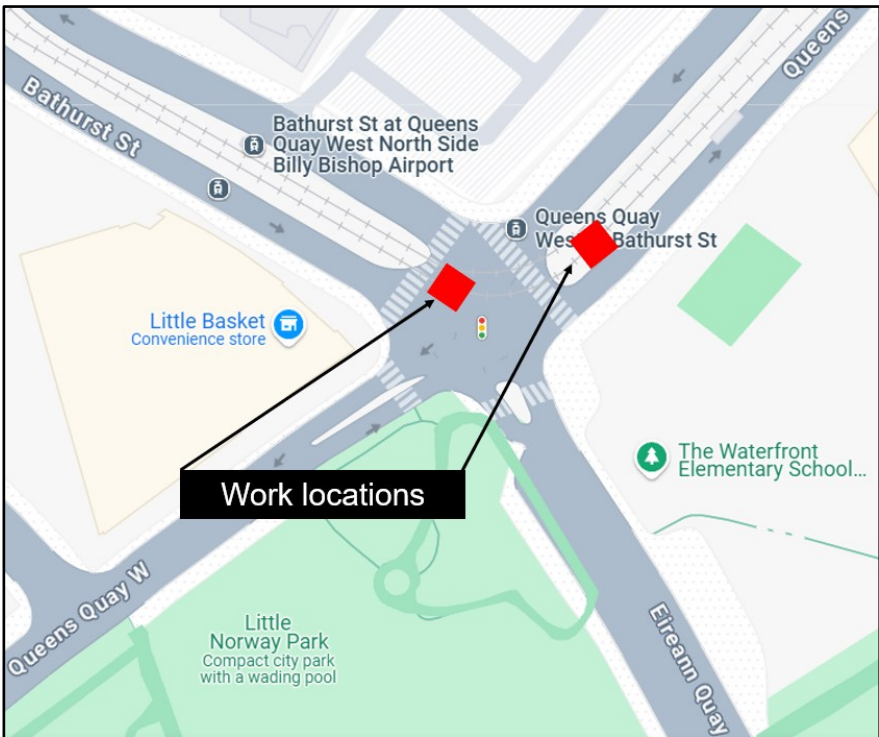

Timeline: June 16 and 17, 2025
**Content/timeline accurate at the time of printing*

What we are doing and why

On **June 16 and 17**, TTC track crews will return to the Queens Quay and Bathurst Street/Eireann Quay intersection to repair a blocked conduit. Crews must excavate two small sections of the streetcar track to clear the conduit. The conduit repair is required to restore regular service on the **509 Harbourfront streetcar** on **Sunday, June 22, 2025.**

Work activities, hours, and timeline

- TTC crews will set up the work zone and begin working on the morning of **June 16.**
- Crews will work 24/7 until the end of the day on **June 17.**
- Work will occur in the two sections highlighted in the map and consist of concrete milling, concrete saw-cutting, concrete breaking/removal, conduit repair, and new concrete placement.
- **Noise is expected, especially during concrete breaking/removal, which will end in the evening of June 16.**

Motorist, cyclist, and pedestrian impacts during construction

- Travel lanes will not be impacted as crews work in the streetcar lanes.
- Turn movements at the intersection will not be impacted
- Pedestrian crossings at the intersection will not be impacted/moved.
- **A paid duty officer will be in on-site to ensure safety and assist with traffic management.**

TTC service impacts

There are no impacts to TTC service as the **509 Harbourfront** streetcar is *temporarily* suspended, and **511 Bathurst streetcars** continue to divert further north due to ongoing overhead wiring work at the Bathurst Street, Lake Shore Boulevard West and Fleet Street watermain intersection. Learn more about these diversions at [ttc.ca](https://www.ttc.ca)

Thank you for your patience as we work to improve transit infrastructure in Toronto.
