

Islington Station Easy Access and Redevelopment Project

Community Update

March 2022

| Status of Easier Access Program

- 55 stations are now accessible.
- Eight stations are under construction:
 - Lansdowne, Donlands, College, Summerhill, Rosedale, Castle Frank, Glencairn and Greenwood.
- Islington Station is in Easier Access Phase III with AODA upgrades scheduled for completion by December 31, 2024.
- The remaining TTC stations will be made accessible by 2025.

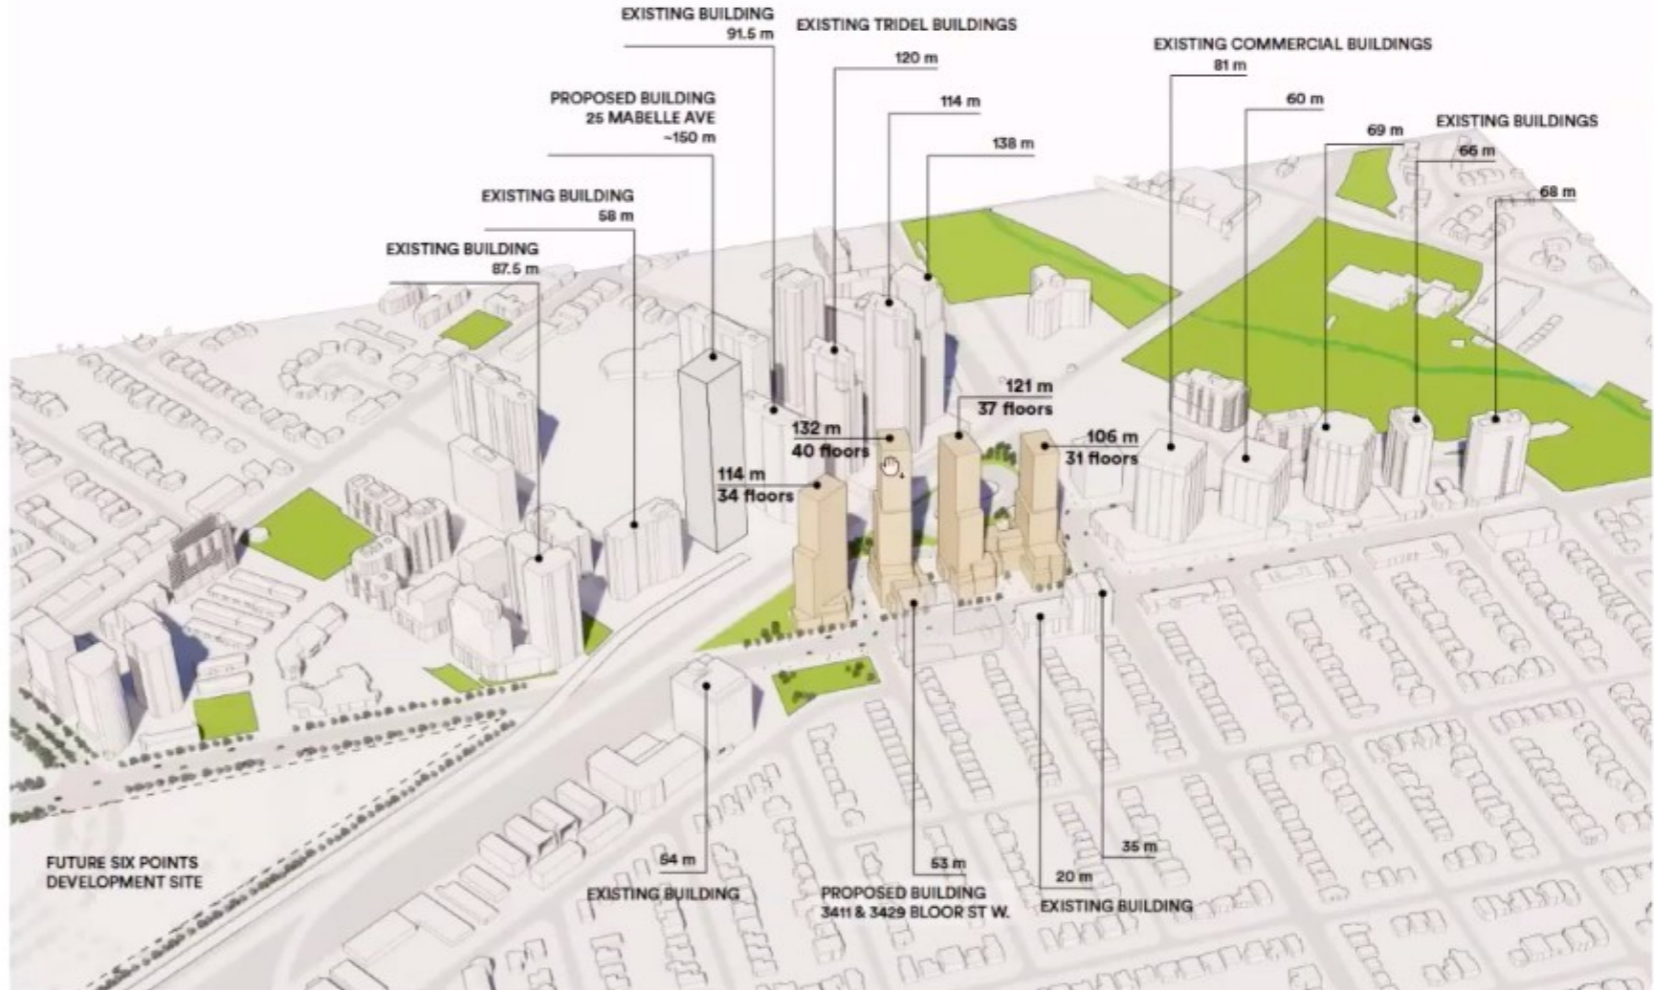

| Islington Station – Easy Access and Redevelopment Project

- Redevelopment of Islington station
 - Improve streetscape in collaboration with the City of Toronto and CreateTO by integrating urban design elements and Public Art throughout the project.
- Improvements to the existing station
 - Three elevators will be installed providing a barrier free path from street level to the platform.
 - Direct pedestrian access via an accessible ramp located at the main West entrance.
- Selective repairs to finishes and wayfinding tiles throughout the Station.
- Construction of a new Bus Terminal to accommodate 5 bus bays.

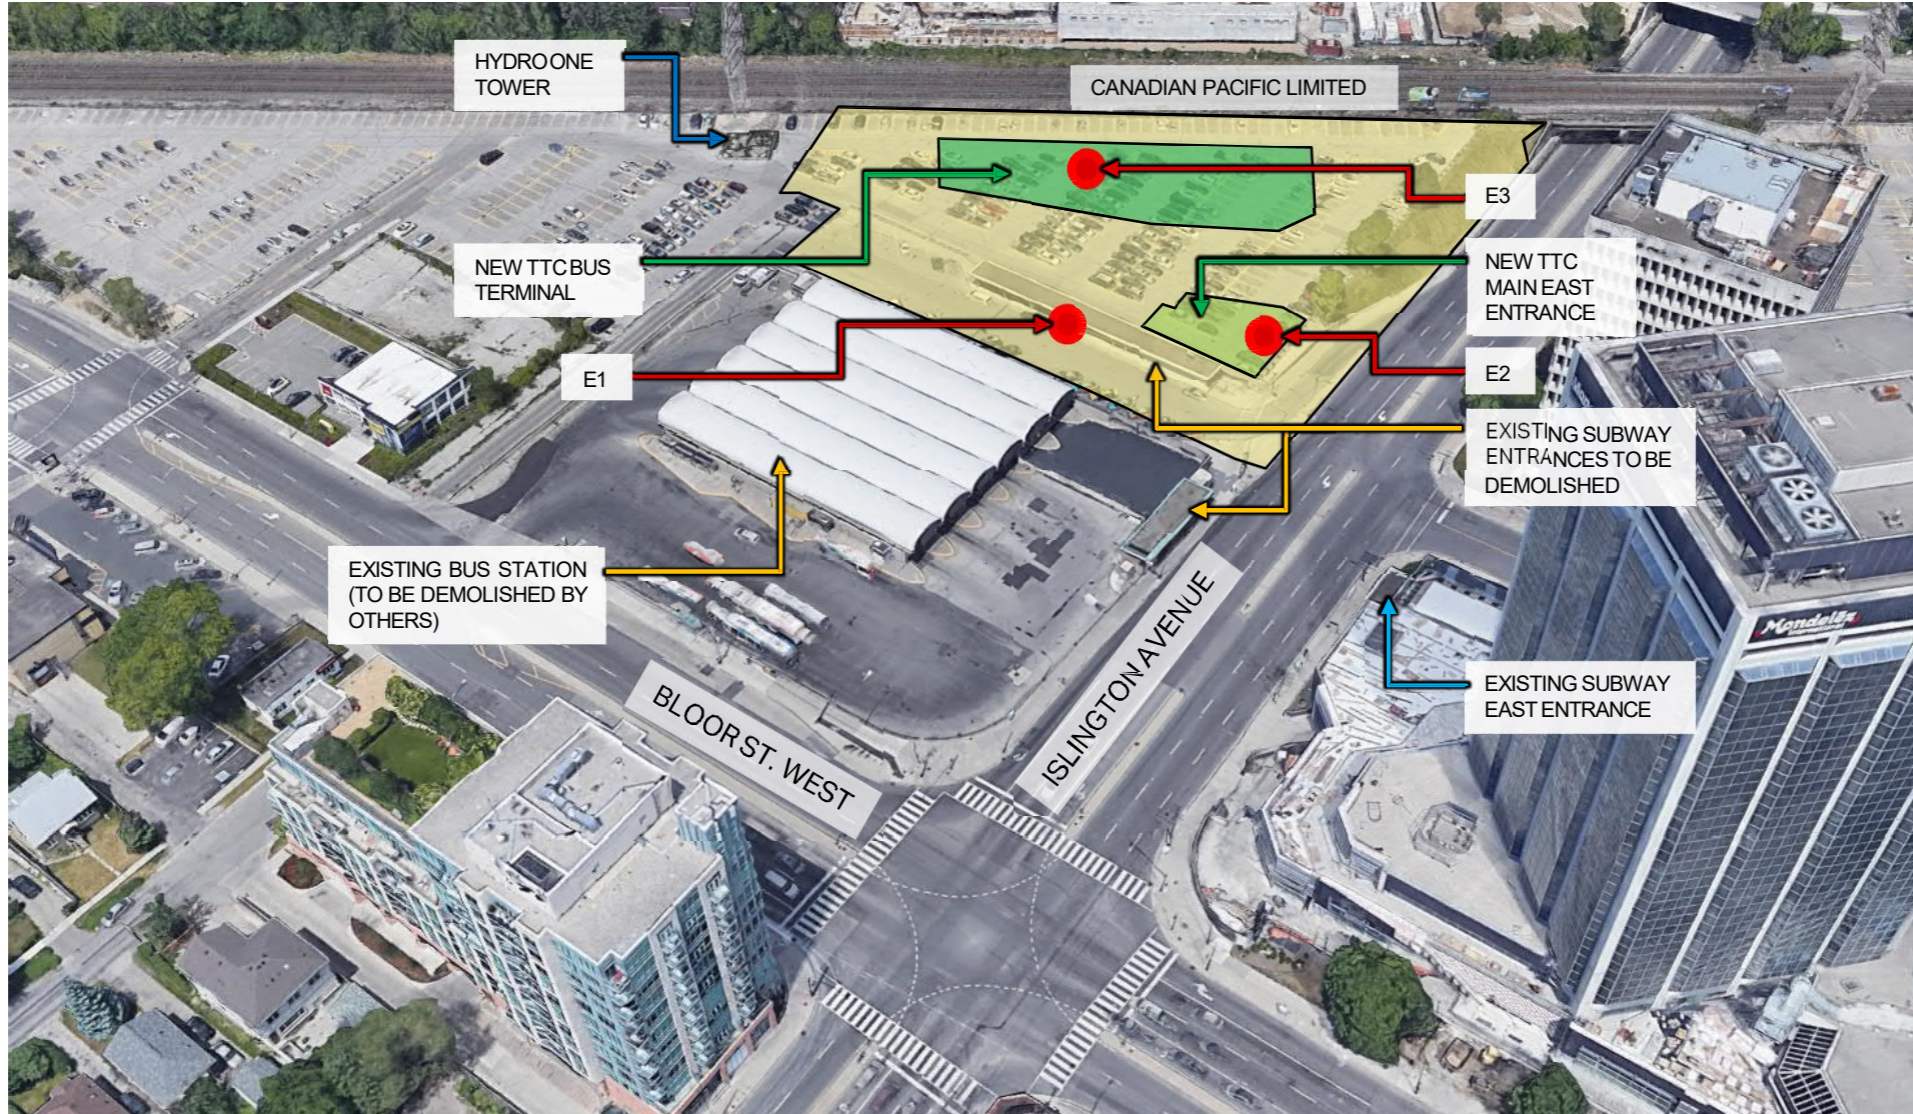

Engagement with CreateTO

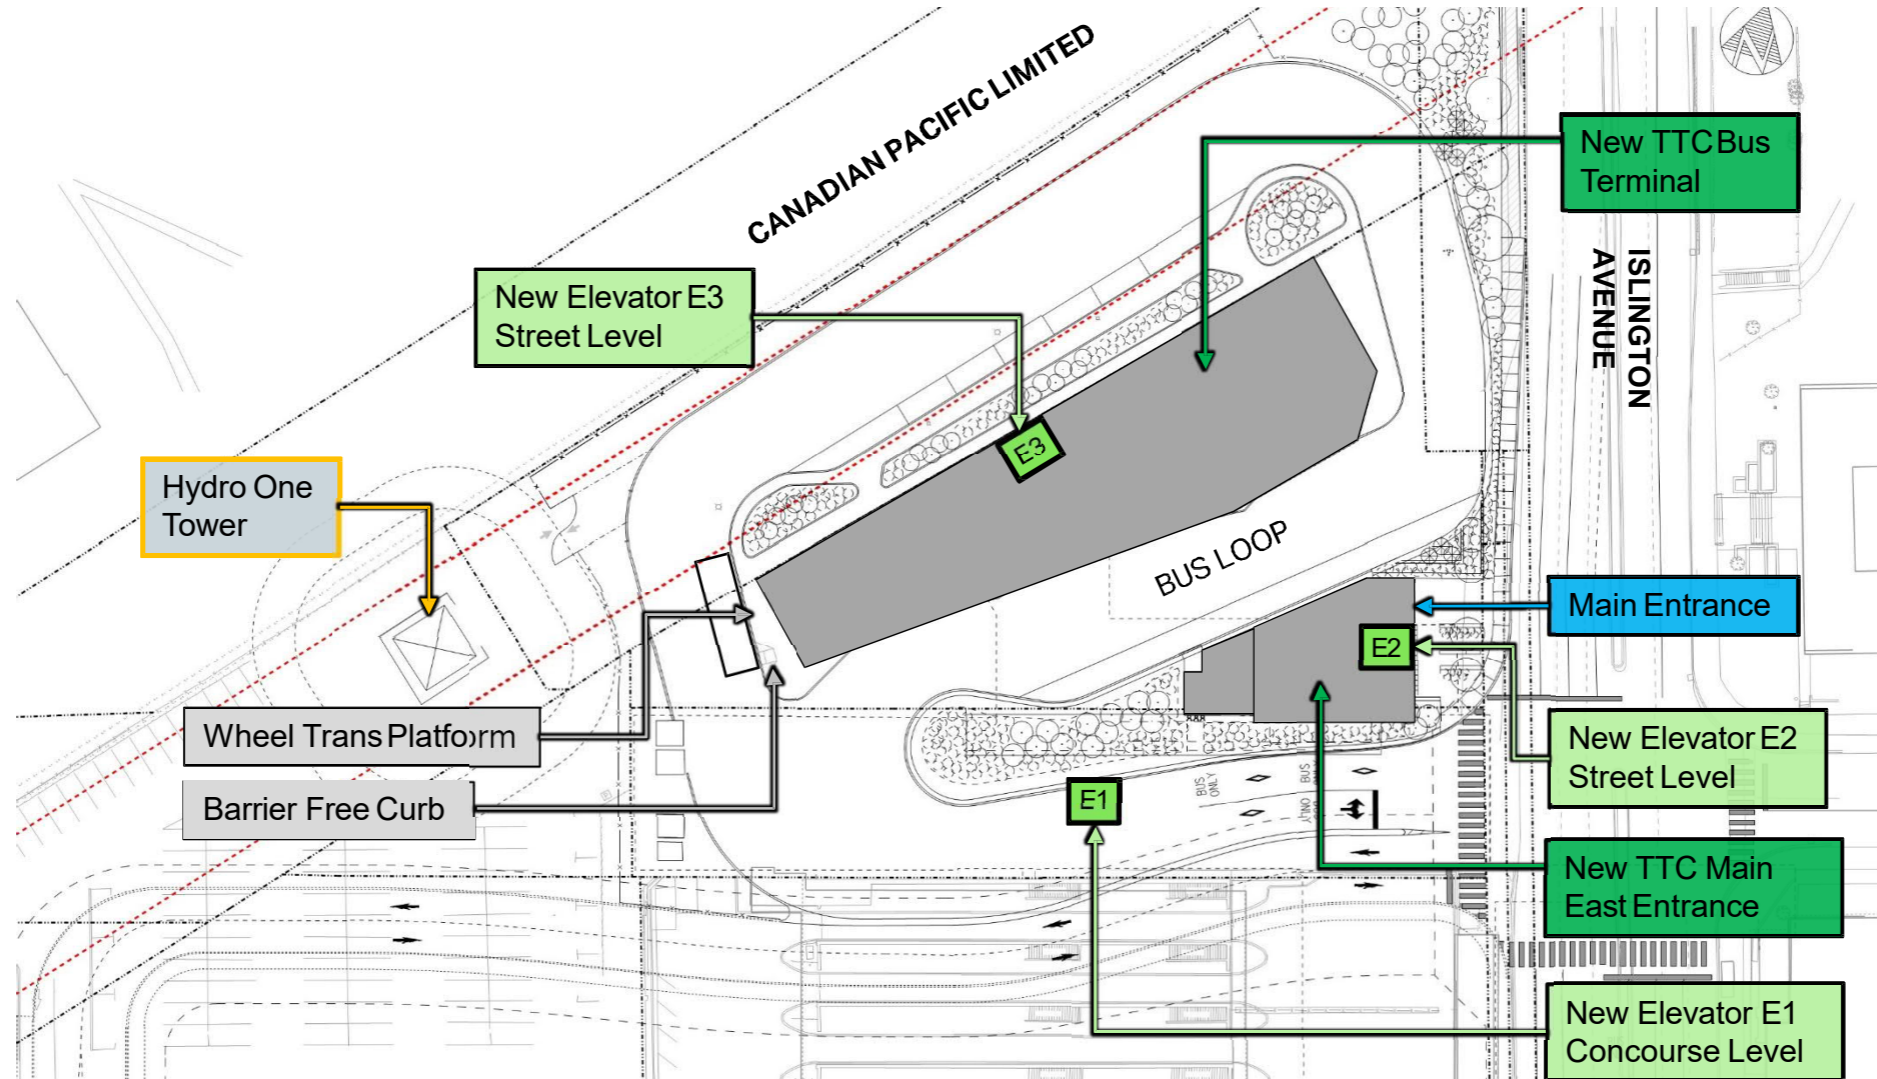

- In 2021, MiWay relocated bus service from Islington Station to the new Kipling Station Transit Hub.
 - MiWay now operates one route via on-street stops outside of Islington Station.
- With Islington's vast space for buses unused, CreateTO has identified this land as an area for redevelopment, including for significant net-new affordable housing units.

Islington Station – Redevelopment Impact and Mitigation

- Staging of material and equipment will be centered around two specific areas beginning in Q1 2023
 - Subway Station Concourse Level and electrical rooms.
 - 60 of the 230 total parking spots in the TTC Lomond Commuter lot in 2023 – 2024.
- Station to be closed for identified weekends in 2023
 - Dates to be shared with community and Councillor in advance of closures, following contract tender.
 - Shuttle buses will be deployed during closure, access to buses will not be disrupted.
- Majority of work occurring within the station between 2023 – 2024
 - Wayfinding signage to be posted throughout.
- West Commuter Lot will be shut down completely for the construction of a new Bus Terminal and for CreateTO development commencing in 2025.
 - 218 of the 534 total parking spots will be permanently lost for this construction.
 - Notice will be provided to surrounding community and parking users via signage and flyer drops in advance.

Islington Station – Parking Impact (2023 – 2024)

- Existing Lomond Commuter Lot will be impacted temporarily as a staging area.
- Target date: 2023 to end of 2024
 - Parking spaces impacted: 60
 - Parking spaces remaining: 170
 - All parking at Lomond to be restored following construction.
- Notice will be provided via signage outside the Station and within Lomond Commuter Lot in advance of commencing work.

| Planned Project Communication in 2022

- **Late March 2022** – Project notices mailed via Canada Post
- **Late March 2022** – TTC project website and social media
- **October 2022** – Project information and signage throughout Station and Lomond Commuter Lot providing notice of upcoming closure
- **October 2022** – Windshield flyers for Commuter Lots
- Dedicated Community Liaison throughout project

| Project Schedule

- **Q2 2022** – Community mail-out and launch of project page
- **Q1 2023** – Contract award
- **Q2 2023** – Construction begins
- **Q4 2024** – Elevators in service and AODA compliance
- **Q3 2026** – Station Redevelopment complete with a new permanent accessible Bus Terminal in service
